Orange County Schools seeks to promote the positive classroom experiences of students. To do so, schools or the district public information officer will frequently contact area news media to report on activities in our schools. The district also publishes student accomplishments on school or district websites. In addition, the media may contact the school district for permission to photograph or video classroom or school activities. There may be invited guests such as corporate sponsors or other individuals who help advance the **Swim for Charlie** water safety program. Media representatives or any other affiliates may not photograph students without principal approval. Only OCS staff will be allowed to photograph students whose parents/guardians opt in for them to be photographed during **Swim for Charlie** water safety classes. **To give the district permission to release photographs/videos or other likenesses of your child to media representatives, please check YES below and sign.**
